## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 17, 2010 has been entered.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 3 and 6 – 9 are rejected under 35 U.S.C. 102(a) as being anticipated by EP 1 293 187 A1.

With respect to claims 1, 3 and 6 – 9, EP 1 293 187 A1 (hereinafter '187) discloses an absorbent article comprising a barrier layer (S1) comprising the claimed materials [0052], a nonwoven [0031] cover layer (4) and a superabsorbent polymer (3) disposed directly on the barrier layer, the superabsorbent polymer being adhered to the article in a pattern configured to distribute fluid/increase tearing resistance in the

Art Unit: 3761

absorbent article (figure 11A), wherein at least one portion of the absorbent article extending essentially completely across the absorbent article is substantially devoid of the superabsorbent polymer (4b) forming an intermittent pattern (cl. 9) as set forth throughout the disclosure, see especially figure 11A.

### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over EP 1 293 187 A1.

With respect to claim 10, '199 teaches the invention substantially as claimed. The difference between '199 and claim 10 is the provision that the article includes a specific superabsorbent polymer.

The examiner contends the process by which the superabsorbent polymer is formed does not provide a patentable distinction between the claimed invention and the prior art. Nevertheless, the substitution of one type of superabsorbent polymer for another is within the level of ordinary skill in the art since the general knowledge to provide the article with a superabsorbent polymer has been disclosed by the prior art.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1, 3 and 6 – 10 have been considered but are moot in view of the new ground(s) of rejection.
